

Early Career Teacher programme

Developing teachers beyond their NQT year through evidence-informed practice and reflection

This is an innovative evidence and practice informed early career development programme, enabling teachers to further develop their classroom practice and leadership within and beyond the classroom.

This programme is co-designed and co-facilitated by UCL Institute of Education and Teaching Schools within Newham to enable teachers to succeed in their early career development.

Programme Details

Who can apply?

This programme is for teachers beyond their NQT year who would like to extend and deepen their thinking and practice.

The programme will help participants to:

- Trial research-informed teaching and learning approaches in their classrooms
- Develop tools to critically evaluate the impact of these approaches
- Enhance their confidence as teachers through collaboration with colleagues in and across Newham schools
- Reflect on and debate the way they teach
- Develop leadership awareness within and beyond their classrooms
- Deepen their 'practice wisdom' - the learning from experience which is critical to the next stage of their development.

Fees

£595 per person for the full programme

Programme Overview

Collaborative learning and joint practice development is at the heart of the *Early Career Teacher* programme. Face to face sessions combine bursts of theory with practical activity. These sessions are interspersed with enquiry projects carried out in school which enable participants to apply learning from the sessions into their leadership practice.

Participants explore six research themes: *What we know about good pedagogy* and *Leadership beyond my classroom*; plus four from *Assessment for Learning and Teaching*, *How best to group pupils*, *Active learning*, *Behaviour for learning*, *Creativity*, *Teacher talk and Pupil talk*, *Learner-driven learning*, *Differentiation*, *Learning about learning*, *Growth mindset*, and *The learning environment*.

The Enquiry Cycle

The learning that is acquired in the sessions is developed during the following half term, so each cycle will consist of:

- Input of theory from research
- Planning to activate the theory
- Designing an enquiry
- Gathering evidence of impact from the classroom
- Sharing the learning with others.

The Early Career Teacher programme is spaced evenly through the year across six half-day sessions, ensuring that professional learning matures into professional development. All sessions are facilitated by current lead practitioners based in Newham schools alongside a programme leader from UCL Institute of Education, London Centre for Leadership in Learning.
